In Paris the quitation is 50 per cent. beginning to perceive that every measure affecting the interests of their white ing 500, and the reeth are extracted after their strival at the city to which are affecting the interests of their white mg 500, and the feet are extraned after their arrival at the city to which the jaws are consigned.

affects their own interests also.

The question, however, which most nearly concerns the fature of the negro is the labor problem; but even the solution of this may be left to the same processes which have brought him safely through the misfortunes and bardships of emancipation. It is not to be dealed that negro labor is unreliable and in some particular. There are the laws are consigned.

The Toronto Globe says that the New Brunawicz and Nova Scotia into one province are progressing favorably, Edward Island could be taken in at would then have an erea of about 49, trom 709,000 to 800,000.

TOW MR TOUNG; OF COLUMNUS, BREAKS A NEW SAMPSRIES "STRAW"

It will be remembered that some

We find however to a late date of the Cohim-

we are proud to reproduce it:

A.—He sa)s "manufacturing cannot prosper
in a locality in which men and women can cain In a locality in which men and women can earn as much by working the soil as in a mill," thus assuming this to be the case in Georgia. Now we sai know what labor commands here on the farm, and that it can be shad for \$30 \$.00 per year, with ment and broad, while constitute in year, with ment and bread, while operatives in our mills average considerably more than that, and I belf-we that laborers on a farm in New England sarn as much as the laborer on a Georgia farm. We are constantly beseiged with applicants for employment, which certainly shows no lack of element out of which to form

a manufacturing class .

Again be ways: "The character of the southern people units them for the service which a factory requires. The only people who ever do what we call a day's work—10 or 11 hours in succession—are the negroes, who can not make good mill hands."

In answer to this I say, our operatives are all white, and uineteen out of twenty natives; they work II hours per day the year round, and have work extra time when called on to do it an bappy, and strikes are never thought of. Ma-sone, carpenters, (whites) and our small furm-ers, (nearly half of the population of the state-

e out-door occupations and can set work, k through each summer day stopping only meals. We have no sun-strokes, and our for years. The extravagance of "Evangeline" is Inters are cold enough for health.

Governor Straw, in common with New Eng.

nd people, asserts that southerners (on ac count of the climate) are not able or willing to sork as they do, but it is not so. The southern ople are as energetic and industrious as the people of any country, not excepting New Eng-land, and are as moral, religious and law-abid-ing as any people in the world. Some few New

England people work in our mills, but show no houses, society, etc. If he does not know that we have all of these now everywhere

in manufacturing? A .- Cheaper labor (we pay no more for labor n the Amoskesg and other northern mills, as the summer and freezing up in the winter, so perb. M. that they have to supplement steam to give "Gabriel."

The advantages for successful manufacturing are so much greater south than north that they must be appreciated soon, and I confidently expect that the youth will eventually be the manufacturing country of the world.

Q.—He says the Augusta mills falled to be abse to supply a foreign demand, what about that

I have heard that purthern mills have exported a good deal recently, but that they made noth-ing by it. If they and it profitable so export display before purchasing elsewhere.

It will be remembered that some time ago, a gentleman from the saste of New Harmastre, published in the northern papers, a satement to the effect that cotton factories in the sorth would prove more profitable than the same factories in New England.

This article was to check the growing tide of caphat that was flowing southward being invested in her factories. It was promptly an exceed and its misetalements unterly wiped on that point?

All do not believe all are paying now, not can be take festiments unterly wiped.

out by the feathroup of practical manufacturers in the south, the most of whom had in past years been manufacturers in the north. These suswers, which restored the current stopped for a moment by Mr. Straw's false figures, were published in This Constitutions.

We find a great the list of the Column.

We find a great the straw's false figures.

We find a great the straw's false figures. which are making same style of goods as the Annexion. We have cleared to percention our capital in each of the four pass panic years. Let Gov Straw who is drawing comparisons between milis north and south say what the Amostes has made. Report says they barned, four fifth of Columbus, so admirable and conclusive, that of one per cent on their capit it of \$3,000,000

on white and colored work. This company has ought 500 four-shuttle looms and 150 faney ooms, all calculated to make fine girghan and dress goods from No. 26 and No. 83 yatu and with these will have about 1,200 looms to do that kind of work and about 400 other looms for making tickings stripes, etc.

EVANGELINE.

Rice's Musical Extravagauma. Rice's Extravegenza Combination company fifty artists, who have met with such a succesion of griumphs in Boston, New York, Chicago and in fact most of the western and southern cities having just closed a two weeks engage ment at the academy of music, New Orleans, opened a brief season of two nights and a matines at the Opera House last even-ing before a large, select and delighted also whites) boys, men and women, work their and lence. The company came here in ten and eleven hours every day in the summer an unpretentious manner, without the cus in the open air, and do not suffer in health from towary fluction of trumpets and preliminary In fact, all classes of white people who i newspaper puffing, but by their very artisti performance they succeeded in achieving the most pronounced success witnessed in this city

> a merry combination of larghable incidents, delightful music, clever puns, hits at the times, delictous absurdities, ad influteum and its per-formances kept the andience in an almost conntious state of bilarity and applause from the Extravegapza almost always defice criticism at "Evangeline," by its very fugenious con-ruction upsets it entirely, and the critic finds aself in the midst of such a succession of unic surprises, povel incidents, etc.; whill

In brief the piece is such a new departure in can in origin, the music having been composed Q - What advantage do you claim over the by Mr Edward E Bice, whose name is so well text by Mr. J. Chemar Goodwin, whose transhan the Amoskesg and other northern mills, as lations for different opers companies are very have learned after thorough investigation); s well known, both residents of this country, that under climate—no lee in winter interropting it has to be seen to be appreciated. The commilder climate—no lie in winter interrupting work, and no drought in summer to effect our mindling water supply: longer days in the winter; less gas required; chesper that; chesper that; chesper that respective parts at least four bundred er building material; abundant water power, and a climate exactly suited to spinning and weaving. All these advantages contrast strongly Webster, a beautiful young lady, made a most against New England, with her blitterly cold charming "Evangeline" dilling the little role to against New England, with her bitterly cold charming "Evangeline," filling the litle role to winters, her small water courses, drying up in parfection. Her costumes was something su-

Another and use most important advantage to miss have over a New England until it in as cheaper material. The advantage to this cheaper material.
